

Abstract of the Disclosure

A playpen with columns comprises a plurality of first corners each having a first bulge and a second bulge, a plurality of second corners each having a first sleeve and a second sleeve, a first rod unit connecting the first corners, a second rod unit connecting the second corners, a plurality of first columns whose one end bushes around the first bulge and another end thereof is inserted into the first sleeve, a plurality of second columns whose one end bushes around the second bulge and another end thereof is inserted into the second sleeve, and a boundary shelter unit covering the first columns. The distance between two opposite second columns is larger than that of two opposite first columns so that the second columns are revealed.
